

## plasters

A universal range of high quality gypsum plasters designed to give cost effective, outstanding results across a wide range of applications. Supplied in easy to handle bags and a range of sizes, the plasters are ideal for rapid repairs, patching, filling cracks and holes as well as finishing and smoothing surfaces.

## basics

A range of three staples, each with distinctive properties. Playpit sand is a specially formulated, fine-textured, non stain material for play. Macadam for repair, maintenance and renovation as a straight-from-the-bag material. Rock Salt is ideal for clearing ice and snow from paths and drives and helps stop it re-forming.

**5KG 10KG**
